

Greetings from Integral, we are a conversion unit working on Dupont Tyvek in India, we process and create innovative products on Tyvek for various industries and special applications. Tyvek is a material without limits, Light weight and versatile yet resilient and durable. Our products are breathable yet resistant to water, abrasion, bacterial penetration and ageing. Our products meet or exceeds industry standards for protection against a wide range of chemical threats and hazards.

Our products are hand crafted by experienced, creative and conscious personnel. The nature of our process ensures each product is totally unique.

Integral originated with the sole objective to provide practical solutions for a variety of users across diverse industries and lifestyles.

It is extremely important to us that our products stand the test of time and daily use.
